

NENG SRR Review**Action Item (AI)**

Originator: Philip Baldwin	AI # 9
Email: Philip.J.Baldwin@nasa.gov	Phone: 301-286-9300
Ref. Slide:	Date: 07/08/2015

Short Summary:

Provide Scott Schaire with a submission date for the SRD to the CCB.

Problem/Comment:

Provide Scott Schaire with a submission date for the SRD to the CCB

Proposed Resolution:

Determine submission and forward to originator

Assigned to:

Salem El-Nimri

Salem.F.El-Nimri@nasa.gov

Assigned Date:

07/13/2015

Resolution:

The DAPHNE project team was asked to modify the requirements shortly after the SRR. The modifications came as a result of the addition of the NISAR mission to the NEN portfolio. The NISAR mission requires two 2 Gbps radio links which is a considerable increase over the original requirements of 600 Mbps. The team is planning to conduct a delta SRR to validate the new requirements. After the delta SRR which is planned for September 2016 the team will submit the requirement document to the NIMO NGIN CM system.

Nen to discuss with Scott Schaire.
